

New Vipp Cabinet System

A system of material curiosity

Vipp brings together oak, marble, and anodized aluminium in a new modular cabinet and storage system. The new Vipp Cabinet system is designed to accommodate the shifting needs of modern living and workspaces. Nine types of modular units can be arranged in numerous configurations allowing for bespoke storage solutions.

Choose between a light colour scheme combining light oak veneer, Sky Grey marble, and natural anodized aluminium, or a dark version in dark oak veneer, Pietra Grey marble, and dark anodized aluminium.

In a domestic domino, show off your possessions on open shelves or hide them behind a reeded aluminium door. Whether opting for a uniform aesthetic with repetition of similar cabinets or highlighting design asymmetry through a combination of open and closed shelves, the cabinet can either be wall-mounted or floor standing on spindly metal legs.

vipp

Opting for a submersed marble plate offers an almost tray-like function and a tactile contrast to the carved oak frame and Vipp's signature material of extruded aluminium.

"Opposites attract when organic materials like stone and wood are complemented with the industrial feel of metal. The trio of high-quality materials elevate a seemingly simple object into a sensory and enduring encounter." – Jette Egelund, 2nd generation Vipp owner.

The system's versatile design makes it ideal for an array of storage and display needs, fitting into both private and workplace settings.

The Vipp Cabinet system is now available in [Vipp stores](#) and on [Vipp.com](#)
